Hi

Proxmox 4.2 look good nice and clean. Doing my first install, copied the iso's to /var/lib/vz/template/iso.

Create VM,

Now point to local for ISO for install of Win2012R2, nothing shows up.

I have had this happen previously when there is space in iso name.

Double checked, no spaces.

Has the file locations been moved ???

If so, what are the new locations for

ISO's

Confug files

VM's

Please.

Tom

no the location has not moved,
can you please post the output of

Code:

```
pvesm status
```

and

Code:

```
ls -l /var/lib/vz/template/iso
```

Best regards,
Dominik

Thanks for the prompt reply.
here are outputs.

```
=====
root@Creative-pm-ve01:~# pvesm status
local dir 1 98952796 7690096 86213152 8.69%
local-lvm lvmthin 1 851853312 14055579 837797732 2.15%
root@Creative-pm-ve01:~#
```

```
=====
root@Creative-pm-ve01:~# ls -l /var/lib/vz/template/iso
total 5993580
-rw-r--r-- 1 root root 522190848 Mar 4 10:30 pmagic_2016_03_02.iso
-rw-r--r-- 1 root root 5397889024 Sep 24 2015 Server2012R2.ISO
-rw-r--r-- 1 root root 160755712 Sep 19 2015 virtio-win-0.1.102.iso
-rw-r--r-- 1 root root 56584192 Apr 16 22:22 virtio-win-0.1.105.iso
root@Creative-pm-ve01:~#
```

The files are there but do not display when pointing CD to iso file Local
Nothing displays. Where as displayed choice of iso's in folder???

mmm... curious....

From the Web GUI, I select *Create VM*, and when try to list the ISO images
from local storage the same problem (show me nothing).

Then, I navigate to local (node-name), select 'Content', and the ISOs are
there...

One more again, I try to *Create VM*, and when select the local storage, now
the ISOs are listed...

Try that...

you just need to add the content typ "ISO" to your local storage.

See "Datacenter/Storage/local"

Best regards,
Tom
